Portfolio

ckeanu.vercel.app

Education

2019-2023

Bachelor of Science in Computer Science

Western Mindanao State University,
Normal Road, Baliwasan, Zamboanga
City, Philippines

2017-2019

SHS – Information & Communication Technology

Southern City Colleges, Pilar Street,
Zamboanga City, Philippines

Skills

- JavaScript
- React.js
- Next.js
- Node.js
- Tailwind CSS
- TypeScript
- Git
- Figma
- Redux
- React Query
- Sass
- Firebase

Certificates

[Resource Speaker at Google Devfest
2023 Zamboanga Peninsula](#)

[DICT Cross-Platform Coding
Bootcamp Using Flutter](#)

[freeCodeCamp Front End
Development Libraries](#)

Ckeanu Richer Q. Locson

Frontend Developer

A Computer Science graduate from Western Mindanao State University with a passion for frontend development. I specialize in building user interfaces for web-based applications using other tools and libraries to make my work more solid and efficient. Utilizing my skills in frontend development is crucial to ensure that the service I deliver meets the standards of a company or my client.

Experience

Frontend Developer

AKA Software Inc. | Sept 2023 - Now

We deliver innovative, customized, and user-friendly website solutions that align perfectly with our client's goals and objectives while specializing in creating and developing websites for businesses across various industries.

Tools I use: React.js, Next.js, Tailwind CSS, Redux, React Query, SCSS, AG Grid, shadcn/ui, Prime React, Visual Studio Code, Figma, Git

Projects

Apprabic: Mobile Application

Year 2023 | Unity 3D, C#, Adobe Illustrator

We built a full-stack mobile application for our thesis in our Computer Science course. The mobile app helps children to learn Arabic letters and numbers, especially in writing, pronunciation, and arranging in order. I took this opportunity to learn Unity 3D since I wanted to build a video game ever since I started programming.

Munta

Year 2022 | Flutter, Firebase

We built this mobile app for our Capstone Project in DICT Cross-Platform Coding Bootcamp Using Flutter. My job here was to turn the design from Figma into a functional user interface while my team focused on the backend with Firebase. After presenting the Capstone Project, we've won the "Best in User Interface (UI) and Design", and "Most Creative awards". This project was inspired by a mobile app called "Maxim".

Online Hotel Booking System

Year 2022 | React, Axios, Node, Express, Axios, MySQL, Framer Motion

We built a full-stack web-based online booking system for a specific hotel here in Zamboanga City, Philippines. The system helps customers book or reserve a room online without going to the hotel. I took this opportunity to learn React, Node, Express, and MySQL to explore and improve my skills for my future career. I built this project to comply with our Software Engineering project in my Computer Science course.
